UTTIL

DESIGN FOR A BETTER FUTURE

Arctic Rock Formations

Arctic Glacier

Aurora Borealis

Arctic Tundra

The inspiration for the colours of the **UTTIL** brand is based on the **Arctic** continent, which is under the most severe threat of global warming. By adopting these colours, **UTTIL** represents its love and respect for nature and emphasises the role it wishes to play in protecting it meticulously.

40% WOOD
60% PP

The decision to use **clear TPE** sleeves emphasizes our commitment to reducing unnecessary additives in our products and highlights the natural beauty and integrity of the material itself. Meanwhile, incorporating wood chips into the plastic accessories aligns with **UTIL**'s dedication to leveraging renewable resources, significantly lowering our tools' environmental footprint without compromising their durability and performance.

Choosing the **NMUK09-AN** or **VMUK09-AN** model means embracing tools designed with the planet in mind. These updates reflect **UTIL**'s holistic approach to sustainability, combining innovative material use with our unwavering commitment to quality and functionality. By opting for these models, you're not just selecting a high-quality tool for your projects but making a conscious choice for a better planet.

Let's work together with **NMUK09-AN** and **VMUK09-AN** to create a sustainable future, one cut at a time.

PAUK06-AN

3-LEVEL LOCK MECHANISM

PRUK06-AN

AUTO-RETRACT MECHANISM

UTTIL is again at the forefront of sustainable innovation with our latest offerings, the **PAUK06-AN** and **PRUK06-AN** models. These utility knives are a testament to **UTTIL**'s unwavering commitment to the environment, featuring bodies crafted from a specially developed **compostable PLA** (Polylactic Acid).

PLA

This **unique PLA blend** contains natural additives that do not compromise its compostability without sacrificing the durability and reliability you expect from **UTTIL** products. We have manufactured the plastic blade housings of these models with **high quality PA** (Polyamide), which provides durability against the wear and tear of steel blades.

Choose the **PAUK06-AN** or **PRUK06-AN** utility knife for top-tier quality and eco-friendly manufacturing. Our **PLA** material reduces traditional plastic consumption and decomposes naturally, setting new environmental standards for the tool industry.

Embrace **UTTIL**'s vision of a more sustainable future with the **PAUK06-AN** and **PRUK06-AN** models where cutting-edge performance meets environmental stewardship.

Join us in making a difference, one hand tool at a time, because with **UTTIL**, choosing better for the planet is as easy as choosing the right tool for the job.

Unbreakable.

UTTIL

DESIGN FOR A BETTER FUTURE

"Elit Elektronik Pazarlama San. ve Tic. Ltd. Sti." was founded in 1993, initially manufacturing and importing/exporting MAP process control systems. We later expanded into the hardware industry by importing disc springs. In 2013, we relocated our company headquarters to the Ikitelli Organized Industrial Zone in Basaksehir and set up our production facility to meet the growing demands of the hardware sector.

We distribute Witt Gasetechnik's MAP process control systems, sell Mubea's disc springs, and manufacture quality caulking guns and utility knives. We continuously expand our product range to keep up with emerging technologies and increase production capacity.

In Q3 2022, we launched "**UTTIL**", a new brand of sustainable hand tools aimed at showcasing the potential of sustainable practices in the hand tools industry. We aim to set a new quality standard and be a role model for future generations.

Elit Elektronik exports worldwide and is ISO-certified with restructured quality standards.

OUR PERCEPTION OF QUALITY

We value high-quality products and customer satisfaction and constantly work on improving ourselves in all areas.

CUSTOM SOLUTIONS

Our highly qualified service team is prepared to meet all your contract manufacturing needs with meticulous quality standards.

OUR ADVANTAGES

We manufacture all of our products in Turkey. The ATR Certificate allows our goods to circulate duty-free within the European Union. Our logistical advantages enable our European customers to place more diminutive and frequent orders and significantly reduce their customs clearance, storage, and shipping costs compared to the Far East market.

We create sustainable hand tools using high-quality raw and recycled materials while avoiding harmful chemicals and heavy metals and minimizing our carbon footprint.

We offer competitive prices in our product quality range due to our manufacturing capacity and supply system.

OUR VISION

To become the leading manufacturer brand in the hand tools market, we strive to offer our customers innovative, economical, and environmentally friendly solutions.

OUR MISSION

We will help the planet with our cutting-edge technology.
